

EPUB 1622 HTML 2 Midterm Website Project Requirements

Your website must contain the following pages and requirements:

- Home Page
- Links
- Contact Us (includes HTML form with validation)
- About Us
- At least one content page related to the website subject
- Use CSS pseudo classes to create interactive links for your main navigation
- All styling of HTML must be implemented using one external CSS document
- Web site must be coded using CSS Grid or Flexbox layout
- All pages must center in the browser.
- All pages must validate to the W3C HTML 5 Specification
- All pages must be hand coded without the use of a CSS framework or WYSIWYG web development tool

If you have other pages in mind, please see me about substitutions to these requirements.

Your website will be graded using the following criteria.

- Website design – 30%
- Navigation and functionality – 20%
- Validation to HTML5 – 30%
- Final Presentation – 20%

The website is considered your midterm project and 15% of your final grade. It is to be presented to the class at mid semester.

No personal portfolio type websites allowed. Our goal is to build websites for our portfolio.
